HotUKDeals already has a few apps, including Basket Buddy, which we featured in Appy Friday ([bit.ly/basket305](http://bit.ly/basket305)), but this is its first official app that lets you access all the website's features on your phone. You can discover what offers, discounts,

voucher codes and freebies are 'Hot' across the web;

use the Local section to find nearby shops, restaurants and attractions that are running deals; or search for offers by shop name. You can also set up deal alerts for keywords or phrases. The app doesn't ask you to log in, but if you become a HUKD member you can post your own deals, as well as seek advice from fellow HUKD community members.

#### Hum This

### GAME

#### Hum This

[bit.ly/humthis305](http://bit.ly/humthis305)

Min requirements: Android 2.2+

File size: 4.1MB

Hum This is a cross between SongPop (which we featured in Issue 297, [bit.ly/issue297](http://bit.ly/issue297)), and Draw Something (see Issue 289, [bit.ly/issue289](http://bit.ly/issue289)). You're given a song to hum and have 10 seconds to record yourself humming it. You then send it to your opponent and they have to guess the name of the song. If you don't want to hum, you can sing instead, but this isn't as challenging!
