Home Improvement Index

Home Improvement Project Budgets

Year on Year Change - Home Improvement Project Budgets

Chris Burke, Director of Analytics said:

"For December 2013 the Home Improvement Project Index was up 63% versus December 2012, increasing through the month as the impact of the series of large storms that hit the UK over the Christmas period drove increased repair work."

Project Budgets continued their decline, indicating that most storm related repairs were of a minor nature.

Year on year we would expect strong double digit project volume growth in January 2014, and the Home Improvement Project Index to rise markedly, to over 400, as the usual seasonal bounce occurs. Project Budgets should also show their usual seasonal rise as big projects are commenced in the new year"

Note: Projects are submitted via RatedPeople.com less re-submitted and/or amended existing projects.
